Timeline of Events

I took Jennifer's ethics class (Summer 2019)

I emailed Jennifer some papers and informed her that I would be taking another philosophy class. She expressed interest in this (7/23/19)

I asked Thomas Lockhart (her husband) to add me to the AUPS event email list. (1/14/2020)

I attended several movie events hosted by Jennifer, including the screening of several X-rated pornographic movies directed by Pedro Almodovar (fall 2019-spring 2020. Almodovar films were shown in 2020. I think her showing of these movies (and the department's endorsement of the events) presents an inconsistency with the possible claim that the sexually explicit nature of my messages makes them "threatening" and/or emotionally disturbing.

I took Jennifers class on philosophy of sex (Spring 2020)

I met with Jennifer for coffee and we talked about her story and me. Jennifer told me she thinks I'm "special". (2/05/2020)

I began using twitter and jennifer's advisor from University of Chicago, agnes callard, began interacting with me and asked me to email her. I feel that Agnes and several other people on Twitter gas-lit me. (6/9/2020-~2022)

I took Jennifers class on Ancient Philosophy (fall 2020)

I met with Jennifer as she asked to meet with me after graduation. (6/7/2021)

I met with Jennifer after I emailed her saying that I loved her and talked about applying to graduate school. She said that she would help me by providing resources, writing letter, etc. (10/6/2021)

I tried to apply to grad-school but Jennifer encouraged me not to because there wasn't enough time (12/14/2021)

I asked Jennifer a few times to explain herself and work with me on my paper. She refused and asked me not to ask her about it again. (2/21/2022)

I went to an event where Jennifer gave a speech on sex and love and prof. John Dyck parodied and made fun of me in a way that has plausbile deniability. He made a paper about love revoloving around Simone Weil, who he has never published professionally on. I had referenced Simone Weil while he was in class, and he was aware that I liked her work. I believe this was another step in deceiving/gas-lighting me. (3/1/2022)

**I emailed Jennifer again about the event, and asked her to explain herself in light of what she said at the event. (3/1/2022)**

**I then received a letter banning me from the Haley Center and from contacting Jennifer. The University also contacted my father and shared my situation with him without my permission. (march 2022)**

I continued to attend the philosophy and religion workshop with profs. Kelly Jolley and Roderick Long

I began to work at burger-fi (throughout 2022)

I asked Keren Gorodeisky, philosophy club advisor, if I could still attend club events. She said I could. (09/27/2022)

I began working on my writing sample for grad school. Kelly Jolley, Roderick Long, and Murray Jardine agreed to help me and did. All 3 agreed to write me a letter of recommendation for grad school. (throughout 2022 and 2023)

I went to all the philosophy events I could, including a movie shown by her husband Thomas Lockhart and nobody told me I couldn't (11/03/22)

I attended a AUPS lecture by I believe Antonio Capuano--no problem

I attended another AUPS lecture given by Kelly Jolley (in Ross Hall), Jennifer was there. I did not speak with her at all. I watched the event and as I was leaving, I was approached by phil. department chair Michael Watkins and aggressively told not to attend any more events due to my situation with Jennifer. (11/04/2022)

I received an updated notice from Auburn Univeristy, banning me from any philosophy department related events. (this was after almost a year of not contacting Jennifer in anyway). (11/14/2022)

When it was time to apply to grad school, Kelly Jolley began ignoring my emails, after verbally agreeing to support my application with a letter. (December 2022)

I began to work at Auburn University as a janitor, and never attempted to contact, stalk, etc. Jennifer. (January 2023)

I then only had two recommenders, so I applied to the few programs that took two letters (including Ole Miss) (early 2023)

I got into Ole Miss (Summer 2023)

I left Auburn for Ole Miss. (August 2023)

I received all As my first semester. (Fall 2023)

I started to become suspicious due to certain patterns of behavior that the Ole Miss faculty knew about my situation at Auburn, and were working with the professors to engage in similar gas-lighting behavior as was done on Twitter and at the AUPS event on love. (Spring 2024)

I went to a conference in Memphis, and felt that it was being done there too. (April 2024)

I confronted several professors at University of Mississippi, Auburn University, and Universtiy of Chicago and began to attempt to, in an avant grade way, make a philosophical point about my treatment and to express my personal beliefs and emotions. (Spring 2024: These are the emails I believe you have)

This included the relevant emails sent to Jennifer Lockhart (which you have)

Unfortunately, this attempt was received as threatening.

**I was arrested in Oxford, MS spent 17 days in jail. (April-May 2024)**

Went to a treatment facility for 30 days after being told that it would help me avoid jail-time. I continued outpatient therapy in Oxford, MS (May-June 2024)

**I was expelled from the University of Mississippi. (August 2024)**

**I was told that I would not be extradited from Mississippi to Auburn. (August 2024)**

**I was then arrested for a warrant in Alabama in Oxford, MS. I spent another ~12 days imprisoned and was transferred to alabama. I was formally informed that I was accused of felony stalking for my emails to Jennifer and that I was banned from Auburn University, and had no-contact order from judge, on bail condition, with Jennifer. Also forced to wear ankle-monitor, despite never being accused of/no evidence of, etc. in person stalking. (August 2024-present)**

**Preliminary Hearing (October 15, 2024)**

**As of 3/3/2026, there has been no movement on the case since the preliminary hearing almost 1.5 years ago today.**
